

HALLOWEEN

October 2026 Issue

where it all started

OCTOBER 26, 2017 / BATTLE ROYALE

WHEN THE SHOP OPENED.

Skull Trooper. Ghoul Trooper. There from the beginning.

It's October 26, 2017. Fortnite Battle Royale has been free for a month, and word is spreading. You're already hooked. You drop a ramp in front of you and run straight up it. You're still figuring things out, but building your way through a fight feels unlike anything else.

On Twitch, you've found a streamer called Ninja, with thousands watching him play. You have no idea that, within months, he'll be playing alongside Drake in front of hundreds of thousands.

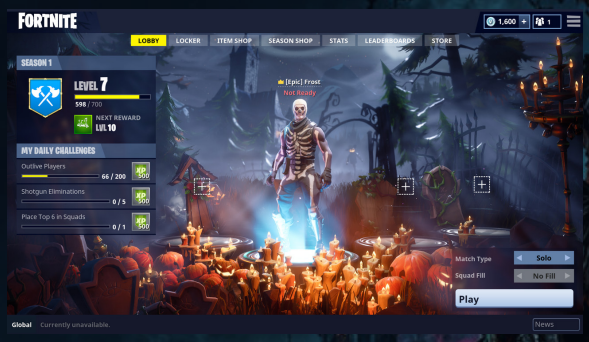

Then you sign in and see it: a brand-new Item Shop. Skull Trooper. Ghoul Trooper. A skeleton suit and green skin staring back at you. Fortnitemares has arrived, bringing some of Battle Royale's very first purchasable outfits.

You're not thinking about rarity or OG status. Buying them feels automatic. You don't even hesitate. The very next match, you're dropping in with some of the sickest skins Fortnite will ever release.

Years later, you see the same face on a Panini card. For a moment, you're right back there.

OCTOBER 10, 2018 / ORIGINAL OWNERS

It's rare to see developers give OG players special treatment, but Skull Trooper's return put it on full display. He had an aura. Owning him was a flex. Opening the shop to everyone could have felt like a slap in the face to the players who were there first. Epic gave the original purchasers the Purple Glow style, keeping a little of that OG status just for them.

FAN ART / A HALLOWEEN TAKE ON A FAMILIAR FACE

NEVER JUST A DEFAULT.

Jonesy went from a default to a central character in Fortnite's story. In the Zero Crisis Finale, Agent Jones and the Foundation worked together to seal the Zero Point, opening Chapter 2, Season 6. Quite a career for a default.
Brainiac belongs in a Jonesy collection, too. A Halloween skin worth remembering when you're building out the binder.
